Mt. Pleasant Blacktopping is not just a paving company. As the owner of a family owned developing company in Butler County Ohio, I have had an incredible business relationship with Ben House for over 20 years. I have used them for everything from Excavating, Grading, Utilities installation, Sanitary sewer, Trunk mains, Water mains (including bored under existing roads), Storm sewer with catch basins and inlets, Curbs and Gutters, Asphalt production, Contracting and paving, Complete subdivision infrastructure construction, Widen/Lower roads, and Relocate existing utilities. No development job goes without last minute changes. MPB has proven repeatedly that they are not only capable, but also receptive to all the last minute changes that come along. Our relationship is based on a firm foundation of honesty and integrity. The bids are always fair and their work is always phenomenal, they stand behind their work if anything arises. There are many aspects of site development, so finding a company that can serve our needs is hard to find. However, MPB has by far met and exceeded all of my expectations for a development contractor. I truly value my relationship with MPB.
